

T Bridge employs about 100 highly specialized professionals. Many of these resources, trained at the most respected Universities, have had previous experience in leading companies in the industry and service sector where they developed the necessary skills, which allow T Bridge to **act as a leader**

in the different markets, from mobility to logistics, from utility to retail, from public authorities to industry and finance.

In the project team, an equally important member is the **Client** himself, with whom T Bridge shares action plans as close as possible and conforming to the environment where it is intervening.
